Forecast for Thursday 07 Oct 2021

Weather: Cloudy with patchy light rain and drizzle, especially across western hills. However it is expected to become brighter in the east for a time around the middle of the day with some sunny spells developing. Cloud is expected to become more widespread later in the afternoon.

Chance of cloud free mountain/hill tops above 600m: Little chance at first and from late afternoon, becoming closer to 30% in west and around 75% in the east for a time around the middle of the day.

Visibility: Periods or persistent cloud above about 300-450m, lifting to around 600m and becoming more occasional across eastern hills for a time around the middle of the day. Otherwise visibility good or very good falling to several kilometres in rain and drizzle.
